DreamFolks

Graduate Engineer Trainee – Software Development

Job Description:

This role is ideal for someone passionate about technology and eager to grow their skills in a supportive and challenging environment. As a part of our development team, you can work on exciting projects, using the latest technologies to design, develop, and implement unique software solutions.

Key Responsibilities:

1. Execute the entire software development lifecycle, from conceptualization to deployment.
2. Write well-designed, testable, and efficient code.
3. Assist in coding, testing, and debugging new software or enhancing existing software.
4. Collaborate with the team to troubleshoot and resolve technical issues.
5. Embrace collaboration and openness to tackle new challenges.
6. Take ownership of projects, seeing them through to successful completion.
7. Participate in design and code reviews, emphasizing the best user experience, performance, scalability, and future expansion.
8. Actively engage in ongoing learning opportunities, training sessions, and professional development.

Preferred Qualifications:

1. B.Tech in CS/IT/EC or EN with 65 percent throughout 10+2+4 with no backlogs.
2. Strong foundation in computer science, with competencies in data structures, algorithms, and software design principles.
3. Proficiency in any programming language.
4. Aptitude to learn, excellent analytical and problem-solving skills.
5. Good verbal and communication skills
